features of internal combustion engines burning natural gas directly injected into the cylinder near TDC. Different approaches to building an engine of this kind are briefed, followed by determination of the engine compression ratio, requirements of the engine fuelling systems, for either compressed natural gas or liquefied natural gas, and selection of

The reader is introduced to the different injection systems (mechanical and electronic). Mention is also made of lubrication and cooling the engine. The final section of the book is dedicated to a discussion on two-stroke engines. The fourth edition of Internal Combustion Engines was published by McGraw Hill Education India Pvt Ltd
