looking for. There's also the ManyBooks RSS feeds that can keep you up to date on a variety of new content, including: All New Titles By Language.

Building With Cob A Step

Cob, cobb or clom (in Wales) is a natural building material made from subsoil, water, fibrous organic material (typically straw), and sometimes lime. The contents of subsoil naturally vary, and if it does not contain the right mixture it can be modified with sand or clay. Cob is fireproof, resistant to seismic activity, and uses low-cost materials, although it is very labour intensive.

Cob (material) - Wikipedia

Cob house construction is a building technique using lumps of earth, sand, straw, and water. Cob can build homes, barns, coops, and more. Since beginning my permaculture adventure, I've been picking up new (yet old) sustainable ways to do

Definition "Earth-sheltering is [...] a generic term with the general meaning: building design in which soil plays an integral part." This definition is problematic however, since earth structures (e.g. rammed earth or cob) are not usually considered as earth shelters as they are above ground. "A building can be described as earth-sheltered when it has a thermally significant amount of soil or ...

Real aioli is really good. However, I have some tips from many failed attempts at getting this right so that any aspiring aioli artisans can learn from my mistakes. 1) You need to get your garlic as fine as possible before you start building your sauce. You don't HAVE TO, but it will take a really long time to come together if you don't.
