It was an extremely important find: Hadrosaurus was one of the first nearly complete dinosaur skeletons found (the first was in 1834, in Maidstone, England), and it was clearly a bipedal creature. This was a revolutionary discovery as, until that point, most scientists had believed dinosaurs walked on four feet, like other lizards.

## **Dinosaur - Wikipedia**

Dinosaurs is an American family sitcom television series that aired on ABC from April 26, 1991, through October 19, 1994, and reruns were shown on Disney Channel. The show, about a family of anthropomorphic dinosaurs, was produced by Michael Jacobs Productions and Jim Henson Television in association with Walt Disney Television and distributed by Buena Vista International, Inc. The characters ...

## **Dinosaurs (TV series) - Wikipedia**

Dinosaurs went extinct about 65 million years ago (at the end of the Cretaceous Period), after living on Earth for about 165 million years. If all of Earth time from the very beginning of the dinosaurs to today were compressed into 365 days (one calendar year), the dinosaurs appeared January 1 and became extinct the third week of September.

LEONELLO CALVETTI / Getty Images. Probably the most instantly recognizable of all dinosaurs is the North American Triceratops (three-horned face), with its parrot-like beak and huge frill at the back of its head. It combined a gentle, plant-eating disposition with three fearsome-looking horns that were probably used both in courtship and keeping hungry tyrannosaurs and raptors at bay.
