Supplement Guide - It Starts with the Egg™

When can babies eat pasta? Pasta may be introduced as soon as a baby is ready to start solids, which is generally around 6 months of age. Take care when introducing pasta if you haven't already introduced egg or wheat into baby's diet yet, as pasta often contains both egg and wheat, which are common food allergens. 1 2 Need ideas for the best first foods for babies?

A pregnancy starts with fertilization, when a woman's egg joins with a man's sperm. Fertilization usually takes place in a fallopian tube that links an ovary to the uterus. If the fertilized egg successfully travels down the fallopian tube and implants in the uterus, an embryo starts growing. Ovulation, fertilization, implantation
