Good quick little study if you are going to troubleshoot circuit boards to the component level or a similar position..... Created by Troy Spratt

Free Electronic Technician Practice Test/Quiz - YouTube

My 2 cents. You will need to know basic electrical theory. Ohm's law, Simple light bulb circuits, etc. I took and passed the signal maintainer exam for NYCT, from that I can tell you that you will not be expected to know any information that's specific to railroad signalling - they don't expect you to know that stuff, they want to see if you have the basic knowledge so you can be trained.
