React in Action [Book] - O'Reilly Online Learning

React in Action Book Description: React is a highly-performant tool that implements a one-way data flow model. Reasoning about an interface or application written with React ends up being much easier because it decreases overall complexity for developers working with it. React in Action introduces front-end developers to the React framework and related tools. Readers will work their way from "raw" React towards JSX, and from basic static components to ones that are dynamic and interactive.

The MIT Refugee Action Hub (ReACT) launched in May 2017 as a response to the MIT SOLVE call to find creative solutions to the problem of refugee education. Professor Admir Masic and Vice Chancellor Ian Waitz championed the creation of a center at MIT to design and deploy new learning opportunities for displaced populations around the world.

MIT ReACT - Refugee Action Hub

There are differing opinions on whether accessing state in action creators is a good idea: Redux creator Dan Abramov feels that it should be limited: "The few use cases where I think it's acceptable is for checking cached data before you make a request, or for checking whether you are authenticated (in other words, doing a conditional dispatch).

javascript - Accessing Redux state in an action creator ...

Redux in Action is an accessible guide to effectively managing state in web applications. Built around common use cases, this practical book starts with a simple task-management application built in React. You'll use the app to learn the Redux workflow, handle asynchronous actions, and get your hands on the Redux developer tools.

Manning | Redux in Action

In React, mutable state is typically kept in the state property of components, and only updated with `setState()`. We can combine the two by making the React state be the "single source of truth". Then the React component that renders a form also controls what happens in that form on subsequent user input.

Forms - React

React-in-Action isn't a good book. It is too wordy, gets too in to theory too early, and the first few chapters rely on executing code in a sandbox environment which is something I don't personally care for. No one gets paid to use technology in CodePen (or whatever.)

Amazon.com: Customer reviews: React in Action

Handling events with React elements is very similar to handling events on DOM elements. There are some syntax differences: React events are named using camelCase, rather than lowercase. With JSX you pass a function as the event handler, rather than a string.

Handling Events - React

React in action. [Mark Tielens Thomas] -- Facebook created React to help deliver amazing user experiences on a website with thousands of components and an incomprehensible amount of traffic. The same powerful tools are available to you too! ...
