Ride Control Electronic Damper Technologies Tenneco
The dampers as such are very durable thanks to an electronic control system which can compensate for wear and tear of the damping performance to a certain degree. Nevertheless, it is necessary to replace this component under certain circumstances - for example, after particularly heavy loads, permanent usage under strenuous road conditions or due to high mileage.

Electronic dampers - Auto Service World
MagneRide is an automotive adaptive suspension with magnetorheological damper system developed by the Delphi Automotive corporation, during a period when the company was a subsidiary of General Motors (GM), that uses magnetically controlled dampers, or shock absorbers, for a highly adaptive ride.As opposed to traditional suspension systems, MagneRide has no mechanical valves or even small ...

MagneRide - Wikipedia
Unlike passive suspensions, which utilize passive shock absorbers and springs to control suspension movement, adaptive suspensions feature electronic dampers that adjust a vehicle's ride and handling characteristics based on driver preference and changes in the driving environment.

Monroe UK | Monroe RideSense Technology
The damper line consists of cable operated and battery powered dampers. Both designs offer models that allow damper adjustment through the face of the air outlet or from a remote access point in a wall, ceiling, or closet. Cable operated dampers are adjusted via rotary cable actuation using either a nut driver or screwdriver.
