Default spacing scale. By default, Tailwind includes a generous and comprehensive numeric spacing scale. The values are proportional, so 16 is twice as much spacing as 8 for example. One spacing unit is equal to 0.25rem, which translates to 4px by default in common browsers.

**Customizing Spacing - Tailwind CSS**
Sentence spacing concerns how spaces are inserted between sentences in typeset text and is a matter of typographical convention. Since the introduction of movable-type printing in Europe, various sentence spacing conventions have been used in languages with a Latin alphabet. These include a normal word space (as between the words in a sentence), a single enlarged space, and two full spaces.
