International Space Station | NASA

Watch the International Space Station pass overhead from several thousand worldwide locations. It is the third brightest object in the sky and easy to spot if you know when to look up. Visible to the naked eye, it looks like a fast-moving plane only much higher and traveling thousands of miles an hour faster!

Spot The Station | NASA

The International Space Station, or the ISS, is a “Multinational collaborative project” by several government space programs, including NASA, the European Space Agency, and Roscosmos. It’s the largest space structure that humans have put into space (so far). It’s also the third-brightest object in the sky according to NASA.

How you can see the International Space Station from Earth ...

The International Space Station (ISS) is a modular space station (habitable artificial satellite) in low Earth orbit. It is a multinational collaborative project between five participating space agencies: NASA (United States), Roscosmos (Russia), JAXA (Japan), ESA (Europe), and CSA (Canada). The ownership and use of the space station is established by intergovernmental treaties and agreements.
